

DIY Birdseed feeder

These couldn't be easier to make, and the birds will thank you once the weather gets cooler. Don't forget the ribbon so you can hang your creations outside.

Ingredients

- 4 tbsp coconut oil
- 2 cups of birdseed

Instructions:

1. Measure the coconut oil into a microwave safe bowl. Microwave until oil melts, about 30 sec. Add birdseed and mix well.
2. Place cookie cutters on a small parchment-lined baking tray. Fill with the birdseed mixture. Using a straw or skewer, poke a hole in the top of each ornament.
3. Refrigerate until ornaments harden. Carefully remove the cookie cutters. Insert a piece of ribbon through the hole to create a loop. Hang your ornaments outside and wait for the birds to arrive.
